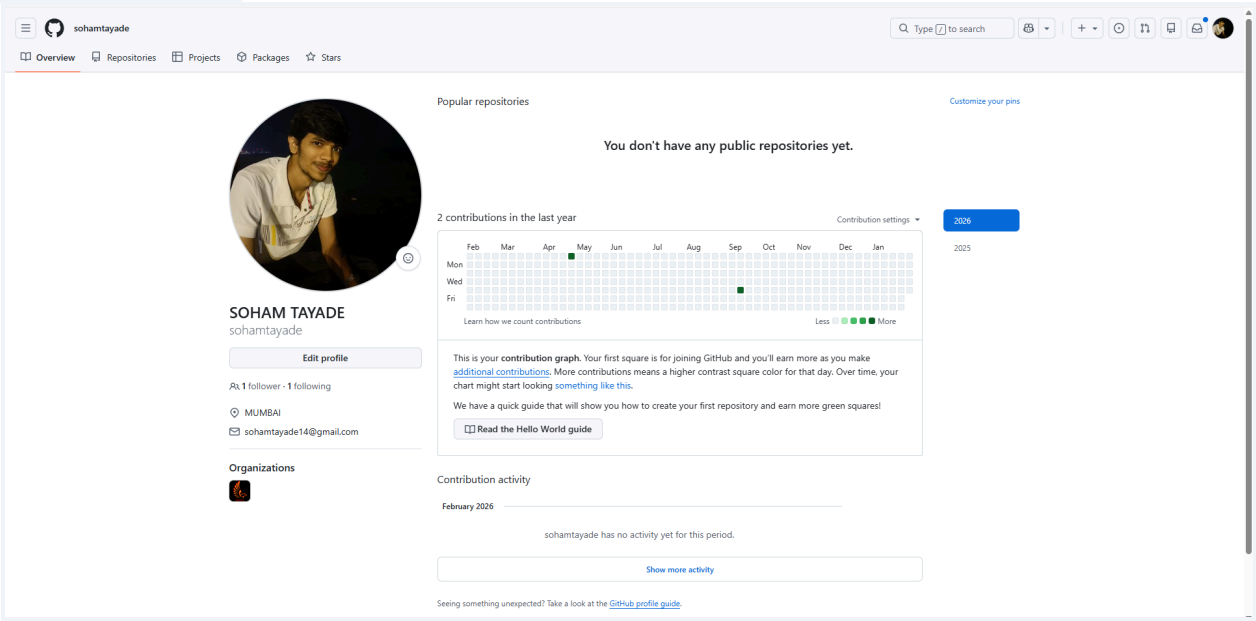
NAME :- SOHAM TAYADE
ROLL NO :- 52
BATCH :- B3 SE3

MDM EXPERIMENT NO 1 :- Install XAMPP / WAMP. Install Git and set up a new repository. Learn fundamental Git commands: add, commit, modify, view. Create and manage branches for version control.

Instructions:
1. Install XAMPP
2. Install Git. Create account in GitHub.
3. Go through the git_github pdf file and execute 4/5 git commands.
4. Take snapshot of git commands and your github account page. Save these in one docx file. Create pdf and upload it as submission part.

GITHUB PROFILE :-



COMMANDS :-

```
MINGW64:/C/Users/ADMIN/soham

ADMIN@DESKTOP-CSP3I9F MINGW64 ~/soham
$ git init
Initialized empty Git repository in C:/Users/ADMIN/harsh/.git/
